County**
MINNESOTA

DAANES Report

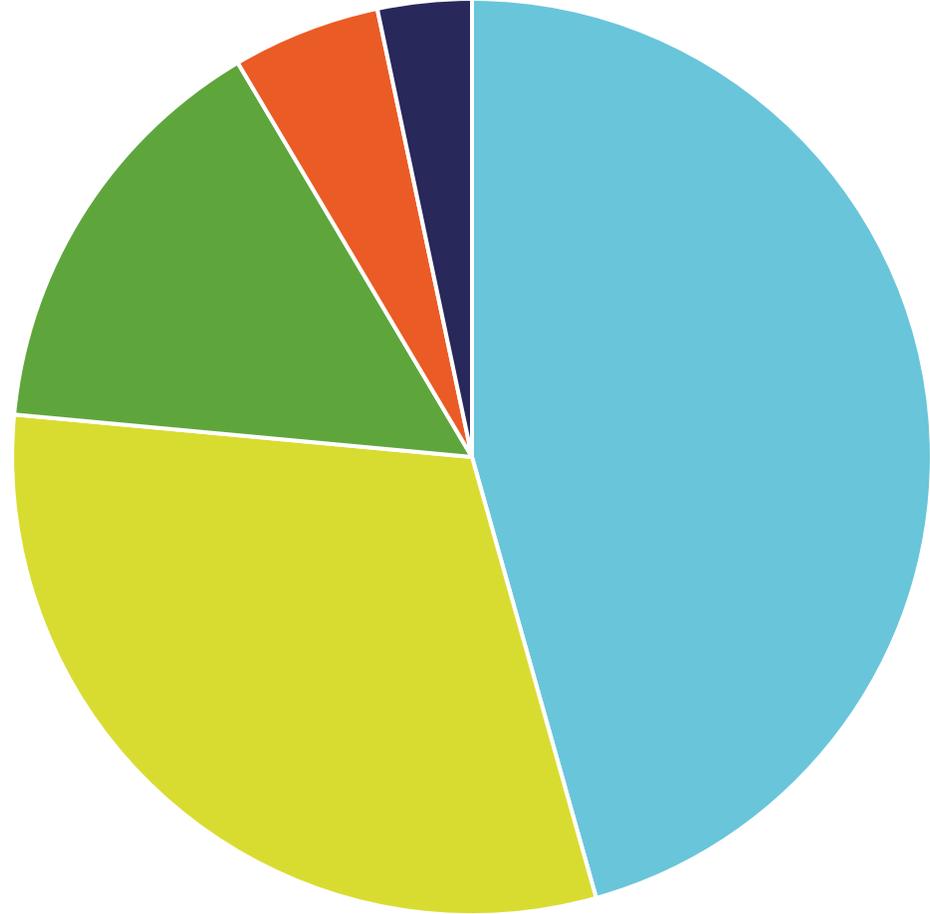

February 20, 2024

Abby Villaran, MA, LMFT

What is DAANES?

- Drug & Alcohol Normative Evaluation System
- A report that DHS `s Behavioral Health Division generates annually
- Data is old when we receive it, however.
- This presentation`s data is from 2022 (most current).
- Data about Substance Use Disorder Treatment admissions in each county
- It compares each County to the Statewide statistics

Primary Substance of Abuse Reported

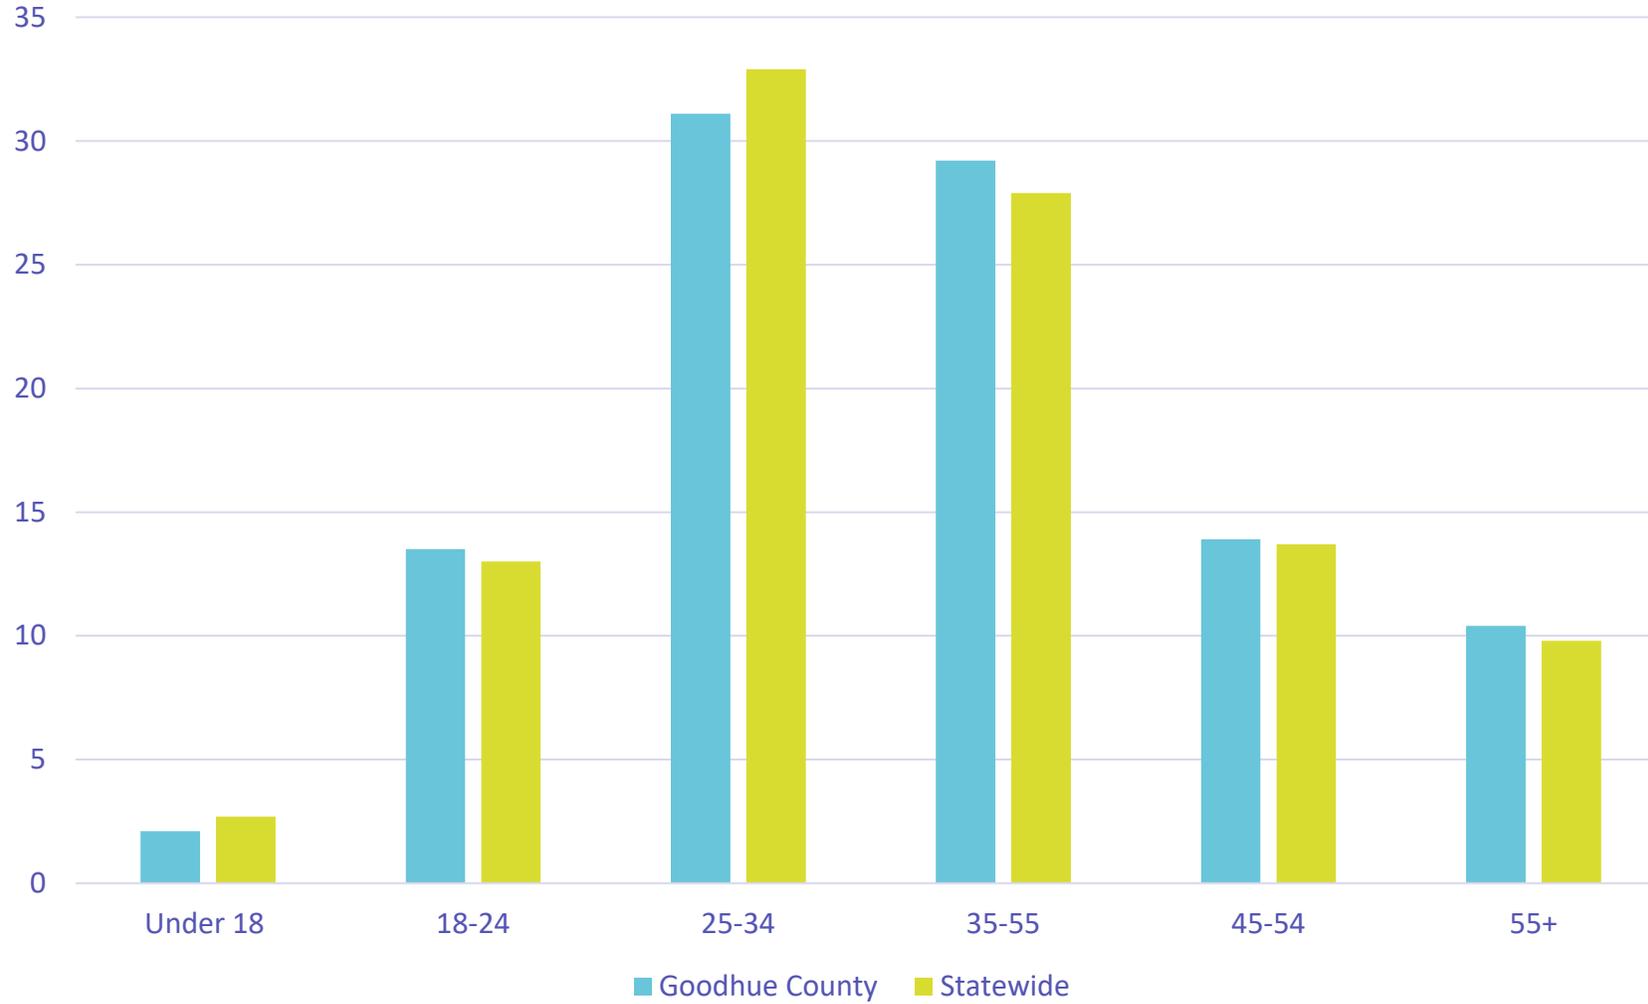

■ Alcohol ■ Methamphetamines ■ Heroin/Opiates ■ Marijuana ■ Other

Data on treatment participants

- 347 total people entered Substance Use Disorder Treatment
- About 50% completed treatment
- Payment breakdown
 - 50% Managed Care (MA, SCHA, Minnesota Care)
 - 17% Private Insurance
 - 13% Behavioral Health Fund (Formerly CCDTF)
 - 11% Self-Pay
 - 7% Other
 - This is close to the state average in all categories

Age of Treatment Participants

Other highlights of data

- High rates of homelessness
- Average Child Protection Involvement
- There were less than 4 women pregnant in 2022-Couldn't calculate a percentage because so low
 - Statewide average is 3.8% of women
 - This is significant because Goodhue Co. has been much higher than the statewide data in the past!
