Person Responsible for Coordination of Health Care Non-Emergency Medical Transportation and Related Ancillary Services: Kathy Rolfer	Telephone Number: 651-385-2005

General Purpose Statement

To ensure that applicants/recipients of Medical Assistance (MA), and MinnesotaCare pregnant women and children under 19 years of age are provided with or reimbursed for the appropriate level of needed transportation and other travel related expenses to enable them to access necessary medical treatment. Local county and tribal agency non-emergency medical transportation (NEMT) services are available to transport the recipient to and from medically necessary services received from participating providers of services covered under the MA and MinnesotaCare programs.

Transportation to non-participating health care providers shall also be paid under this plan if:

- the medically necessary service is covered under the MA state plan; and
- the non-participating medical/dental provider could be a participating provider if an application was made; and
- the transport results in the proper, efficient, and cost-effective administration of Minnesota Health Care Programs services.

Cost Effectiveness

Per Federal Regulations, transportation for each trip made by a recipient must be by the most cost effective means available that meets the needs of the recipient.

1. The local county/tribal agency must document or describe the method or process of establishing the “least costly” appropriate method of transportation.

Goodhue County Health & Human Services will determine the “least costly” method of transportation by having conversations with the recipients, reviewing case records, and reviewing health care access eligibility case documentation. Recipients are required to use their own vehicle or vehicle of a person with vested interest, when available.

2. The local county/tribal agency must document or describe the process used in establishing the appropriate level of transport and related ancillary services approved, authorized, or denied to the recipient.

Goodhue County Health & Human Services will determine the appropriate level of transport and related ancillary services by using conversations with recipients, medical records, conversations with stakeholders, i.e. case managers, social workers, records in eligibility case files, etc. Recipients are required to use their own vehicle or vehicle of a person with vested interest, when available.

3. The local county and tribal agencies shall direct recipients to utilize all available sources of free transportation services (such as relatives, friends, other public options if available) if it meets the needs of the recipient.
4. The next most cost-effective means of transportation under this plan is transport by the recipient's vehicle. Includes vehicles provided by other individuals with a “vested interest” in the recipient.
5. Reimbursement will not be made to a recipient or other person if the mode of transportation used or related travel expenses are furnished at no cost to the recipient.
6. Transport for a covered medical service that is obtained from a primary care provider is limited to 30 miles from the recipient's home/residence for local county/tribal agency and state administered NEMT.
7. Transport for a covered medical service obtained from a specialty care provider is limited to 60 miles from the recipient's home/residence for local county/tribal agency and state administered NEMT.
8. Prior authorization to exceed the 30- or 60-mile transport limits for all NEMT must:
 - Be requested by the MHCP recipient for review by the local county or tribal agency;
 - Be authorized or denied by the local county or tribal agency;
 - Be based on medical necessity with no other provider capable of providing the level of care needed closer than the requested destination provider location, and
 - Must be documented and documentation maintained as part of the transportation record by the local county or tribal agency.
9. Reimbursement will not be made for trips/mileage traveled without a recipient in the vehicle (no load miles).

The service is “RideConnect” and is for non-emergency medical transportation (NEMT) services to help SCHA members to get to and from their health care appointments.

In the space below, please communicate any policies and procedures not covered in the Biennial Access Plan Bulletin and attachment documents that reflect county/tribal agency administration of Access Services.
