

Goodhue County Online Health Topic Prioritization Survey Results

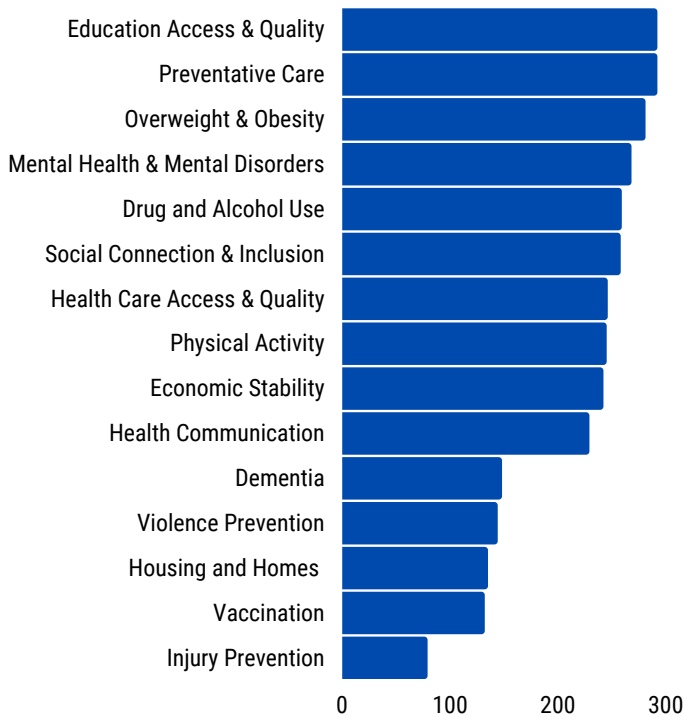

What is this?

In April 2022 an online survey was conducted to gather further feedback from the community on the top fifteen health issues. The survey consisted of two questions, “In thinking about your own health and well-being, what concerns you most?” and “In thinking about the community’s health and well-being, what concerns you most?” Respondents were able to select up to three health issues for each question and optionally enter their contact information for a chance to win a gift card.

The survey was promoted through social media and had over 1100 responses. Survey results were reviewed by the core group of the community health assessment committee and used to narrow the list of health issues down to ten.

Results

Top concerns among respondents when thinking about their *own* health

Top concerns among respondents when thinking about their *community's* health
